

Attaché Installation and Upgrade Guides

This space includes information about installing and upgrading Attaché desktop products. The information is aimed at system administrators familiar with Microsoft Windows environments. If you are not sure about any aspect of the installation process, particularly in a networked environment, please contact your Attaché consultant.

Other resources

- Information on using Attaché products can be found in the main [Attaché Help Centre](#)
- Information on the features and changes in specific Attaché releases can be found in [Attaché release notes](#)
